ACKNOWLEDGEMENTS

The completion of this thesis would not have been possible without support of many people.

First and foremost, I would like to express my thanks for my advisor, Dr. Sa, for his enthusiasm, encouragement, constructive suggestions and empathy he rendered me throughout my thesis work.

I am indebted to Ato Kinati Chimdeṣsa, a graduate student at Mekele University, and Amensisa Desalegn who sacrificed their time and energy in translating the questionnaires from English to Afan Oromo and editing the instruments.

I would like to extend my appreciation to my elder brother, Ato Urgessa Desalegn, for his support in editing the first draft of my thesis and providing invaluable suggestions concerning the overall organization of the thesis. Further, I would like to express special thanks to directors, teachers, record officers and students of the target schools, who made the research possible.

My deep appreciation also goes to my wife, W/ro Bizunesh Ketema, for extending moral support throughout my educational career.

Finally, I particularly would like to extend my thanks for W/t Hyemanot Tekalegn and W/ro Aselefech Fayissa who carefully typed the first and final draft of the thesis.
